ABOUT US

Alliance Innovation General Contracting Est. works hard to establish and preserve a culture that inspires our enthusiastic and diverse workforce to add value for our clients.

AIGC, which was established in (YYYY), is becoming one of the most wellknown firms for trading and contracting in KSA. By keeping an eye on the markets, sharing market trends, and respecting the needs of our customers, we work to deliver the best service at fair and affordable rates. We operate in a number of different industries, including those that provide manpower services, industrial material supply, fabrication services, heavy machinery rental, fencing services, construction and contracting, and scrap services. Whatever your needs are, our team can help you transform the stress of project and workforce management into a sustainable revenue stream for your company.

Mission

Deliver top-notch infrastructure projects through innovation and costeffective, high-quality services in keeping with our stakeholders' goals of building an internationally recognisable brand and supporting our nation's Vision 2030.

Vision

To be the leading worldwide player in industrial and refinery projects, signing under the prestigious for tomorrow's business world, integrating cutting-edge, safe, environmentally friendly technologies with its expertise, excellence, and top-notch work.

MANPOWER

TRADING/INDUSTRIAL MATERIAL SUPPLY

As a company that deals in materials, AIGC places a high value on its relationships with customers, whether they are individuals or businesses. The company takes pride in its capacity to meet customer requirements

quickly and affordably.

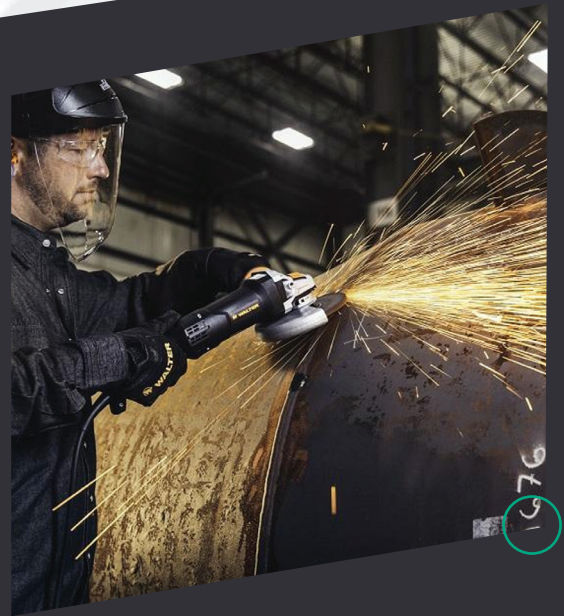

We have been successfully providing various contracting and construction supplies, equipment, and tools, including the complete range of Mechanical, Instrumentation, and Electrical items. To meet project requirements, we have a global sourcing database with aggressive bids.

FABRICATION SERVICES

Our technical specialists are always looking for ways to simplify the process of project delivery. Regardless of the industry, fabrication is one method we can increase capital efficiencies for our clients.

We take a flexible approach to fabrication solutions and provide a variety of fabrication choices to meet the individual requirements of our clients. Due to AIGC's extensive EPC and project management expertise, we can optimise the overall fabrication and construction configuration for the benefit of both cost and schedule. We create steel components on demand. Flame cutting, laser

cutting, forming, tube bending, welding, and powder finishing are some of our available services. Aluminium, stainless steel, and steel are our areas of expertise. Large or tiny steel structures are both possible. We offer quick production, stringent material control, and excellent welding quality.

HEAVY EQUIPMENT RENTAL

In the construction machinery sector, we offer the widest selection of heavy equipment rentals and contractor tool rentals. In addition to having a wide range of services, we also have one of the finest fleets in the business in terms of performance and age. The large inventory of cranes, pumps, power production tools, trench shoring and shielding equipment, scaffolding, climate control tools, remediation and restoration tools, and other items owned by AIGC. Quality is important to AIGC, and both its workers and its tools have received certification from Saudi Aramco as well as endorsements from other prestigious safety and service-led organisations across the Kingdom. Whether the scope of your project is commercial, residential, or municipal, a task for a niche service sector, or a DIY project, AIGC Rentals has the tools you need to get the job done.

FENCING SERVICES

Civil and fencing work make up a sizable part of AIGC Contracting's contracting activity. Fence projects can vary from the delivery and installation of temporary security fencing for the public and private sectors to the delivery and erection of high-quality steel, mesh, chain link, barbed wire, and wire fencing.

SCAFFOLDING

AIGC provides a safe working platform for workers to access higher areas. AIGC Scaffolding services involve the design, installation, and maintenance of scaffolding structures. AIGC also provides Scaffolding materials scaffolding tubes & fittings, cuplock system scaffolding, and scaffolding boards & planks. These services may also include dismantling and removal of the scaffolding after the construction work is completed. Scaffolding services providers ensure that the scaffolding meets safety standards and regulations and that it is tailored to the specific needs of the construction project.

CONSTRUCTION & CONTRACTING

Buildings, roads, bridges, water systems, and other projects involving public works are all included in the planning, construction, and maintenance services offered by AIGC. As opposed to construction services, which deal with the real building process, civil engineering is the area of engineering that is concentrated on the design and construction of infrastructure.

In building and maintaining the infrastructure that supports contemporary civilization, AIGC services are essential. These services make certain that structures and facilities are built securely, effectively, and in accordance with all applicable laws and codes. They also include routine upkeep and repairs of current infrastructure to guarantee its continued safety and functionality.

Being a provider of AIGC services requires a mix of technological knowhow, project management abilities, and a dedication to quality and safety. Civil engineers, architects, project managers, construction workers, and other experts may work in this industry. They collaborate to plan, create, and construct the infrastructure that underpins our towns and promotes economic development.

SCRAP

In KSA, AIGC has many years of experience in the waste and demolition industries. We gather ferrous and non-ferrous, link, aluminium, electric, plastic, and wooden refuse, copper, hardware, machine, IT scrap, paper, and organizer scrap, as well as waste from construction and development materials, cable, and old machinery.
